Notice (Mini Project Group Formation)

All the Students of TE (E & TC) (2022-23) are hereby informed to form their Mini Project groups for third year projects. The last date of Project group submission is 21st Feb. 2023.

Follow the guidelines given below while forming the project groups:

1. Project groups should be of 3 to 4 members only (less members are not allowed)
2. Once Project group is submitted no changes will be entertained.
3. To avoid further consequences try to form the project groups with the students with proper understanding and discussion. No disputes or other queries except project work will be entertained by Project Guide, Project Coordinator or HOD.
4. After project group formation search for project topics which will be selected by panel members after presentation of selected topics
5. Project Guides will be allotted by Project Coordinator and HOD on 22nd Feb 2023.

SEM- II (2022-23)

Class: - TE (E & TC)

Date: 19th May 2023

NOTICE

All the Students members of TE E&TC Engineering are hereby informed that, Internship SPPU Term work exam Submission is scheduled on 22nd May 2023, Thursday. Internship evaluation will be for 100 marks. All the students' members are supposed to contact the Internship Coordinator (Dept. TPC) and discuss the status of the internship report before 21st May 2023. All students should prepare the Internship report considering following points:

Notes:- All students should prepare the Internship report considering following points:

1. Prepare internship report of 25-30 Pages
2. Submit 1 Copy of report with Spiral Binding duly signed by Internship coordinator (Dept. TPC) and HOD (Refer SPPU syllabus)
3. Carry logbook (week wise report) and Original internship certificate with you at the time of submission.

Class - BE (E & TC)

Date: 27th July 2022

Notice (Project Group Formation)

All the Students of BE E & TC (2022-23) are hereby informed to form their project groups for final year projects. The last date of Project group submission is **30 July 2022, Saturday**. Follow the guidelines given below while forming the project groups:

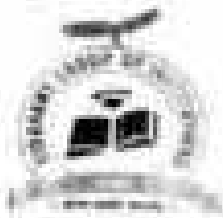

1. Project groups should be of 3 to 4 members only (less members are not allowed).
2. In case any student is year down in the group, vacancy will be filled by project coordinator.
3. Once Project group is submitted no changes will be entertained.
4. While filling Google form write your full name in given sequence only, with correct mail ids and mobile numbers which will be used for further communication throughout the year.
5. To avoid further consequences try to form the project groups with the students with proper understanding and discussion. No disputes or other queries except project work will be entertained by Project Guide, Project Coordinator or HOD.
6. After project group formation search for project topics which will be selected by panel members after presentation of selected topics.
7. Project Guides will be allotted by Project Coordinator and HOD on 2nd August 2022.

Notice

All the students of BE E & TC Engineering are hereby informed that, Project Review-III is scheduled on **10th Nov 2022, Thursday at 11.00 am**. All the Project Groups are supposed to contact the respective Guides and discuss the status of the project before. Project Groups Should Prepare the Presentation (PPT) for review. Following Points to should be included in Presentation:

1. Introduction
2. Problem statement
3. Objectives
4. Concept
5. Plan (Complete Plan to Finish the Project)
6. Literature Review
7. Design Calculations
8. Experimental Layout
9. Purchase of Material
10. Fabrication
11. Assembly
12. Experimentation
13. Analysis.

This review has weightage of 50% of Term work marks. Project Groups should prepare the Presentation accordingly. All the Group members should be present at the time of Project Review.

PROJECT TITLE FINALIZATION NOTICE

All the students of BE Computer Engineering are hereby informed that project title finalization is scheduled as per given below:

Date	Group no.	Time	Location
01/09/2022	All	09:30 am to 04:00 pm	LINUX LAB

In Project Title Finalization, Project Group should explain all the three project ideas in front of the Panel members. One of the Projects Titles will be finalized if found proper or changes will be suggested if required.

Details of all the project ideas should be brought on the plain paper. (No PPT presentation is required).

Project Title

**Blockchain-Based Insurance Claim For Farmers With Smart
Contract**

Project by-

1. Vaibhav Nalawade
2. Pratiksha Hajare
3. Vaibhavi Wayal
4. Tejas ADHALRAO

ACADEMIC YEAR: 2022 - 2023

Abstract:

A blockchain-based insurance system for farmers could help to improve the efficiency and accuracy of insurance claims processing, as well as help to reduce fraud and corruption. The system could also help to ensure that farmers receive the full benefits to which they are entitled.

Problem Statement:

The insurance sector is ripe for disruption by blockchain technology. By using blockchain, insurance companies can create a decentralized, secure and tamper-proof record of transactions. This would allow for a more efficient and transparent insurance system, benefiting both insurance companies and insurance policyholders.

Introduction:

Blockchain-based insurance system for farmers with smart contracts. The system is designed to provide farmers with insurance coverage against crop failure due to natural disasters. The system uses smart contracts to automatically calculate and pay out insurance claims to farmers based on data from the weather cloud app. The system will be designed to be tamper-proof and to provide a transparent and efficient way for farmers to receive insurance payments.

Literature survey:

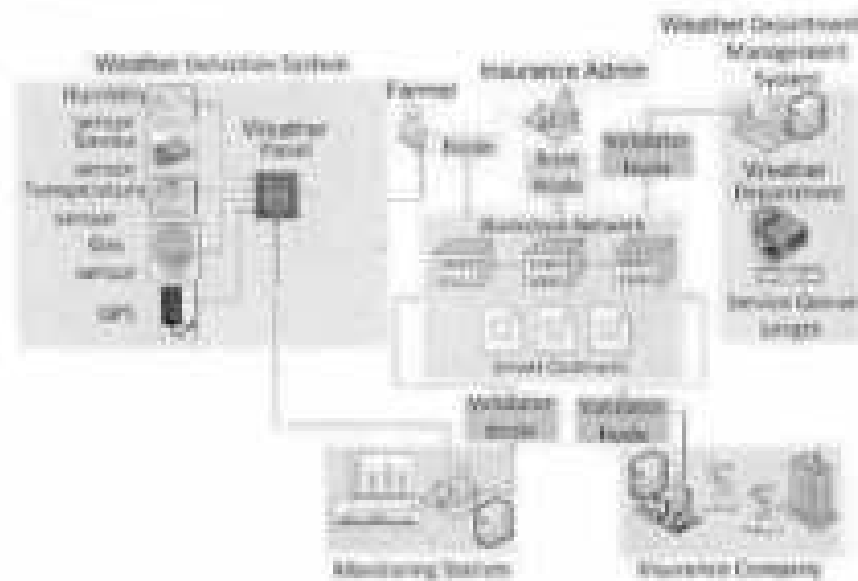

A blockchain-based insurance system for farmers could help to increase transparency and reduce fraud in the insurance industry. By using blockchain technology, insurers would be able to track the history of a farmer's claims and better assess the risk of insuring them. This could help to reduce the cost of insurance for farmers and make it more accessible.

Existing systems:

There are a few disadvantages of existing systems for blockchain-based insurance system for farmers. First, the insurance system is often slow to pay out claims, which can be a major problem for farmers who need the money to cover their expenses. Second, the system can be complicated and difficult to understand, which can make it difficult for farmers to know what they are covered for and how to file a claim. Finally, the system can be expensive, which can make it difficult for farmers to afford the coverage they need.

Proposed System:

Algorithm:

- Step 1: The farmer signs up for an account and provides their personal information.
- Step 2: The farmer selects the type of insurance they need.
- Step 3: The farmer provides information about their farm and geographical location.
- Step 4: The farmer pays the premium for their insurance.
- Step 5: Weather conditions change farmers are automatically eligible for the insurance fund.
- Step 6: The farmer uses the blockchain to file a claim.
- Step 7: The farmer receives payment from the insurance company through blockchain.

TECHNICAL REQUIREMENTS:

HARDWARE REQUIREMENTS	
Processor	Intel Pentium IV or later
Ram	Minimum 1024 MB
Secondary storage	Minimum 120 GB
SOFTWARE REQUIREMENTS	
Operating System Server	Windows 7 or later
Database	Blockchain
Client	Chrome Browser, Minusmark
Tools and environment	Node Js, NPM, VS Code
User Interface	ReactJS
Code Behind	Solidity, JavaScript, Node Js

(Project Group Formation)

Department of Civil Engineering

All the Students of BE Civil (2021-22) are hereby informed to form their project groups for final year projects. The last date of Project group submission is **26th August 2022, Friday**. Link for Project group submission is given below in notice. Follow the guidelines given below while forming the project groups:

1. Project groups should be of **4 members only** (less members are not allowed).
2. In case any student is **year down** in the group, vacancy will be filled by project coordinator.
3. Once Project group is submitted no changes will be entertained.
4. While filling Google form write your full name in given sequence only, with correct mail id and mobile numbers which will be used for further communication throughout the year.
5. To avoid further consequences try to form the project groups with the students with proper understanding and discussion. No disputes or other queries except project work will be entertained by Project Guide, Project Coordinator or HOD.
6. After project group formation search for project topics which will be selected by panel members after presentation of selected topics.
7. Project Guide choices also to be submitted in google form. (Allotment will be done on the basis of availability)
8. Project Guides will be allotted by Project Coordinator and HOD on 28th July 2021.

Savitribai Phule Pune University, Pune
Third Year Information Technology (2019 Course)
114455: Internship

Teaching Scheme:	Credit Scheme:	Examination Scheme:
Theory (TH) : 4 hrs/week	04 Credit	Team work: 100 Marks

Prerequisite Courses: If Any

Course Objectives:

- To encourage and provide opportunities for students to get professional/personal experience through internships.
- To learn and apply the technical knowledge gained from academics /classroom learning in real life/industrial situations.
- To get familiar with various tools and technologies used in industries and their applications.
- To enable students to develop professional skills and expand their professional network with the development of employer-valued skills like teamwork, communication.
- To apply the experience gained from industrial internship to the academic course completion project.
- To nurture professional and societal ethics in students.
- Understand the social, economic and administrative considerations that influence the working environment of industrial organizations.

Course Outcomes:

On completion of the internship, learner will be able to –

- CO1: Develop professional competence through industry internship.
- CO2: Apply academic knowledge in a personal and professional environment.
- CO3: Build the professional network and expose students to future employers.
- CO4: Apply professional and societal ethics in their day-to-day life.
- CO5: Become a responsible professional having social, economic and administrative considerations.
- CO6: Make own career goals and personal aspirations.

Guidelines:

Internships are educational and career development opportunities, providing practical experience in a field or discipline. Internships are far more important as the employers are looking for employees who are properly skilled and having awareness about industry environment, practices and culture. Internship is structured, short- term, supervised training often focused around particular tasks or projects with defined time scales.

Core objective is to expose technical students to the industrial environment, which cannot be simulated/experienced in the classroom and hence creating competent professionals in the industry and to understand the social, economic and administrative considerations that influence the working environment of industrial organizations.

Engineering internships are intended to provide students with an opportunity to apply theoretical knowledge from academics to the realities of the field work/training. The following guidelines are proposed to give academic credit for the internship undergone as a part of the Third Year Engineering curriculum.

Final Year Information Technology (2019 Course)
414448: Project Stage I

Teaching Scheme:	Credit Scheme:	Examination Scheme:
Tutorial (TUT): 02 hrs/week	02 Credits	Term Work: 50 Marks
Prerequisite Courses, if any: PBL, Seminar, Basic knowledge of Latest Technologies in IT.		
Co-requisite Course, if any: NOT APPLICABLE		
Course Objectives: 1. To build up their practical experience with implementation and hence develops self-confidence. 2. To generate the opportunities to experience practically the facts learned in various fields together. 3. To improve overall communication skill, Teamwork and Leadership Qualities, professionalism. 4. To apply the knowledge for solving real-time problems. 5. To evaluate alternative approaches and justify the use of selected tools and methods.		
Course Outcomes: On completion of the course, students will be able to- - CO1. To apply knowledge of mathematics, science, and engineering to formulate the Problem statement. - CO2. To design and conduct experiments, as well as to analyse and interpret data. - CO3. Understand the professional and ethical responsibility. - CO4. To communicate effectively. - CO5. Get broad education which is necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context. - CO6. Recognition of the need for, and an ability to engage in life-long learning. - CO7. To use the techniques, skills, and modern engineering tools necessary for engineering practices. - CO8. To design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.		
Introductory Information: BE Project can be application oriented and/or will be based on some innovative work in recent technologies like IoT, Cloud Computing, Web Technologies, Bio-Inspired Algorithms, Artificial Intelligence, Machine Learning, Natural Language Processing, Theoretical Computer Science Fundamentals. In Project Phase-I the student will undertake project over the academic year, which will involve the analysis, design of a system or sub-system in the area identified earlier in the field of Information Technology and Computer Science and Engineering. The project will be undertaken preferably by a group of 3-4 students who will jointly work and implement the project. The group will select a project based on their internship or Guide can suggest based on recent technologies / Industrial Applications.
